Southern Illinois Writer Publishes Second Book!

Harrisburg, Illinois - July, 2002 - Illinois author, Misti R. Jackson announces the release and availability of her Writer's Reference, "On The Net Resource Guide For Writers," released by Texas publisher, Virtual Bookworm.

Since our readership is comprised of mainly authors, I would like to recommend my new book "On the Net, Resource Guide for Writers." It provides several listings of markets and resources for writers. Some resources include: publishers (print on demand, eBook and more), editors, literary agents, research sites, clubs and mailing lists for writers, book promotion sites, online newsletters and e-zines for writers, sites to sample query letters, book award sites and many more.

The alphabetical indexes help the writer to easily find the publisher, agent, editor or genre they're searching for. In addition, there are over 450 markets and resources--all can be found on the Internet--right from their home office.

Whether searching for a publisher, editor, agent, job or just a resource to help with writing or promotion, "On the Net, Resource Guide for Writers" is the most useful tool for a writer to keep by his/her computer.

Reviewers of "On the Net Resource Guide for Writers" had the following to say: "This book mimics the classic "Writer's Market" format. Certain contacts are similar, but On the Net does cover a publicity-related niche not found in "Writer's Market."

On the Net is a handy supplement to the current "Writer's Market." Many of the contacts can be found elsewhere, but who wants to spend time looking when this book does it for you? Misti Jackson's compilation is an asset to any personal writing library," says Amy Coffin, from The Book Haven.

"A lot of research and patience has gone into this book; it is well-arranged and methodical, easy to read and written in plain English. For those of us who do not know or understand the writing world language and where to start, this book is a great first step on your road to becoming a successful writer. I would definitely recommend this book to anyone who is trying to start a career in the writing world," says Samantha Rose, from E-book Reviews Weekly.

"I would like to congratulate Ms. Jackson for the wonderful job she has done researching her book, "On the Net Resource Guide for Writers." There is no fanfare in her book, but she gets right to the point of information. This is something we all appreciate as writers.

With over 200 pages and more than 17 topics listed, the author gives you a wealth of needed publishing insight. Ms. Jackson has done a thorough job in her research and writing of this book. This reviewer found valuable answers for my own writing questions. It is one that should be on the desk of all authors, as a quick review book and a source of publishing information. This book is worth its weight in gold, for the time alone that you will save, in not having to search this material out yourself. I highly recommend it," says Shirley Johnson, from "Denise's Pieces Book Reviews."
